I'm an experienced Front End Developer with more than 5 years of working in HTML, CSS, and JavaScript. I'm good at creating websites that look nice and work well on different devices. I know about the latest ways of building websites and using front-end tools. I want a challenging job as a Front End Developer where I can use my skills to make websites that people like to use. I like working with a team and learning new things. Right now, I'm in Australia with a Work and Holidays Visa.

WORK EXPERIENCE

CGI Consultancy - Front End Developer

2021 - 2023   Barcelona, ES

- Developed and maintained a responsive web application using Oracle JET, serving 1500 employees in the sales sector. Ensured optimal user experience and adherence to industry best practices.
- Conducted unit testing and debugging to achieve 100% success in each component, ensuring seamless functionality and high user satisfaction.
- Make the application intuitive by improving certain processes, improving service calls. This change increased the usability of the application by 25%.
- Joined a cross-functional team of 15 people, including back-end developers, project managers and designers, to implement custom screens using Agile methodology.
- Mentored 2 new junior front-end developers on team in expanding JavaScript, React, and Oracle JET skillset.
